	design of experiments methodology to find the		
	optimal dosage of supplementary cementitious		
	materials concerning strength development. He		
	compared the results of blended concrete with		
	that of normal concrete concerning strength and		
	durability. He concluded that when		
	supplementary cementitious materials are		
	blended up to 30% replacing an equal amount of		
	cement, yields better results than normal		
Q3.	concrete.	CO5	2.5+2.5 =5
	(a) Write an abstract for the passage given above		
	Ans: Students can write the abstract in		
	their own ways containing the following		
	points:		
	Research problem		
	Solution suggested		
	Methodology followed		
	Broad results of the study		
	 Contribution of the study 		
	(b) Suggest five keywords		
	Ans: Students can write keywords of their		
	own related to the abstract.
