Dynamic Method lookup.

*) In Dynamic Method Dispatch we are creating the object of derived class with the Reference of base class.

*) In Dynamic Method lookup we are creating the object of derived class by the Reference of Interface.

e.g.
```
interface I1
    {
        void show();
    }

class xyz implements I1
    {
        public void show()
        {
            S.o.p ("Hello");
        }
    }

    p.s.v.m (  )
    {
        I1 ob = new xyz();
        ob. show();
    }
}
```

o/p

Hello.
