Command line

*) Command line arguments are arguments which are supplied to the main class at the time of execution.

*) we should provide the input at command prompt.

eg. compile → javac filename.java
   → command line

   run → java file name
   → command line

*) Read the data from command line.

class cmdline
{
   p.s.v.m. (String args[]).   → Used to store values from parse from cmd line
   {
      for (i=0; i< args.length; i++)
      {
         s.o.p (args [i]);
      } }

      javac cmdline.java
      java cmd line x y z

   find the sum of two nos.

___

class Abc
{
   p s v m (String args[])
   {
      int a, b, c;
      a= Integer. parseInt (args[0]);
      b=   "   " (args [1]);
      c= a+b;
   } } s.o.p ("sum= " +c)
